

Mass spectrometry at the Max-Delbrück Center Post-Doc Position

Job description

The mass spectrometry laboratory at the Max-Delbrück Center for molecular medicine in Berlin (Germany) searches for a postdoctoral researcher with a background in biochemistry or molecular biology. The project "Targeting Malignant Plasticity" is funded by Experimental and Clinical Research Center for 2 years.

Requirement

The Dittmar group has an open position for a postdoctoral researcher who will use quantitative shot-gun proteomics and SRM-based targeted proteomics to investigate different signaling pathways in cancer cells. The qualified candidate possess a PhD in life sciences. Prior knowledge in mass spectrometry or computer sciences would be helpful, but are not required.
